Islamji,
Sent the two files (Land Master 1.1)

Can you see if Shamima or Priyanka can open the attached files in AutoCad or ArcGis and let me know if they can see the vector image?
This vector image has curves and tons of nodes.

Dhananjay has not able to view this file in autocad and don't have ArcGis.
This is the last step to observe if the new algorithms are working.

It will be great if they can overlay this with R...013_1 raster image and send back the dwg file.

Need help with attached files Inbox

Zoom meeting Monday Jan 13 at 4 pm IST Inbox

Dhananjay Agarwal 13 Jan
to Priyanka, me ▾

Hi Priyanka:

Please see a separate email providing details on the polygon files I have generated that need review. Can you also have Samar review them as well.

Would appreciate it if you can carve out some time today and meet me at 4 pm IST to share your feedback. Will send a Google Meet invite as a placeholder request. Hopefully, you will accept.

Thank you,
Dhananjay

Dhananjay Agarwal 13 Jan

Dhananjay Agarwal 13 Jan

to Priyanka, me

Hi Priyanka:

I am making progress but need some feedback before I go further down this path. Please bear in mind that this is in an iterative solution and our goal is to significantly reduce manual effort but not eliminate it.

Attached are 2 sets of files for clip1 and clip 2 which are sections of the mauza ending in 119. There are 3 files in each set - jpg for the section of the map, dxf file with polygons and alignment and dwg file with my attempt at alignment. There are few obvious errors especially where the Bengali font is touching the land boundaries.

Can you test the polygons with the Topology function of Autocad? Also, can you review and identify additional areas of improvement?

I have started a [document](https://docs.google.com/document/d/1RHXM5vn7TD4q74btXO98834ufaycE520shjilwfpXm4/edit?usp=drive_link) (https://docs.google.com/document/d/1RHXM5vn7TD4q74btXO98834ufaycE520shjilwfpXm4/edit?usp=drive_link) identifying patterns and places requiring manual work. We can use this to improve the program where possible.

Thank you,
Dhananjay

Thank you,
Dhananjay

Dhananjay Agarwal 8 Jan

to Priyanka, me ▾

Hi Priyanka:

TY for your reply. Can we try to overlay the raster and the vector file on the MAC version with your help tomorrow? I am hoping that with your help, we can do it in the MAC version without MAP-3D. You had mentioned during our last meeting that templates may be an easier way. Can you please send me the AutoCad templates so I can play with them before our meeting.

There are two many choices on the ESRI product site for me to choose and I am not clear on which product to buy. You can see the choices [here](#)? The [Personal ArcGIS Online](#) product is what I am considering buying but it does not have ArcMaps. We can also look closely at your screen on any other branding on the ArcGIS product that you use.

I am fine with the jpg format. In the automated process, I have to remove the land parcel-numberings and they are connected to the lines in a few places in the jpg. As a result I have to do manual cleanup as I can't filter them out as speckles. I was thinking that the letters are not joined with the line on the actual physical maps and a lossless file format like Tiff would show that and reduce my cleanup time. Based on your experience are the numbers connected to the lines in a few places when you visually look at them?

I had another request. May I request you to create an Excel document with the following four columns: Step Number, Process Description, Tool Used, and Avg. Time prior to our meeting. This will help me understand the entire current state processes and not miss anything. Also, it will help streamline our meeting. If you don't find time, it's OK. We can jointly create it during our meeting.

Look forward to our meeting tomorrow, Jan 9th at 4:30 pm IST.

Thank you,
Dhananjay

On Wed, Jan 8, 2025 at 2:11AM Priyanka Sarkar <priyankasarkar20@gmail.com> wrote:

Hello,
We are using Autocad map 3D. We need to do topology after digitization. For this topology we need map tools. This tool is present in Autocad Map 3D .
We don't use any coordinate point. We have just aligned to do an overlay. We have only the Jpeg Format. we Cannot provide a tiff image.
We are using Arcgis Software.

Thanks & Regards,
Priyanka Sarkar

Dhananjay Agarwal 2 Jan

to Priyanka, me

Hi Priyanka:

For the attached Mauza map ending in (119), I have a corresponding vector map with lines and not polygons.

I need some feedback on the current output. Can you please overlay them and let me know what is good and what is bad when we meet.

Thank you,
Dhananjay
